INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

During the month of September 2019, the international commodity prices for gold, platinum, nickel, copper and crude oil registered increases.

Precious Metals

Precious metal prices increased, on the back of a strong safe haven demand outlook. This was underpinned by rising political uncertainty in the US, stemming from the impeachment inquiry for the US President. In addition, weak economic data from the euro zone stoked global recession fears and bolstered the demand for precious metals.

Against this backdrop, gold and platinum prices firmed by 0.9% and 9.9%, to close at monthly averages of US\$1,511.27/oz and US\$944.14/oz, respectively, during the month under review.

Base metals

Copper prices rebounded during the month under review, amid rising expectations for a possible breakthrough in the on-going US-China trade talks. This followed reports that the US had agreed to delay hiking tariffs on Chinese imports.

The gains in copper prices were, however, dampened by slowing global demand, amid signs of weak industrial data of the Chinese economy. Consequently, copper price increased marginally by 0.6%, to close the month at an average of US\$5,750.61 per tonne, from US\$5,714.23 per tonne in August 2019.

Nickel prices sustained a bullish run, amid fears of shortages, following Indonesia's announcement of a ban on ore exports, starting from January 2020. Resultantly, prices rose by 12.3%, from US\$15,717.43 per tonne in August 2019 to 17,654.50 per tonne, during the month under review.

Brent Crude Oil

Brent crude oil prices surged during the month under analysis, on account of signs of declining crude oil inventories in the US, the world's largest oil consumer. Furthermore, investor expectations for further production cuts by the Organization of Petroleum Exporting Countries in 2020, also boosted crude oil prices. Consequently, prices firmed by 5.0%, from a monthly average of US\$59.73 per barrel in the previous month, to US\$62.74 per barrel in September 2019.

MERCHANDISE TRADE DEVELOPMENTS

The country's total merchandise trade increased by 7.2%, from US\$729.9 million in August 2019 to US\$782.2 million in September 2019. This was driven by increases in both merchandise exports and imports.

Merchandise Exports

Monthly merchandise exports increased by 9.5% to US\$378.4 million in September 2019. This followed increases in export earnings from flue cured tobacco (41.0%); nickel ores & concentrates (31.8%); and gold (7.7%).

Figure 4: Merchandise Exports (US\$ m)

The country's export basket continued to be biased towards primary commodities, with gold, nickel and flue-cured tobacco contributing about 72.0% of the country's export earnings, during the period under review.

Merchandise Imports

Merchandise imports rose by 5.0% to US\$403.7 million in September 2019, from US\$384.4 million in August 2019. The increase was largely on account of higher imports of diesel, fertilizers, medicines and electricity, as shown in Table 2.

MONETARY DEVELOPMENTS²

The annual broad money³ growth rate stood at 139.79% in September 2019, an increase of 32.42 percentage points, from 107.37% recorded in August 2019. This was largely reflected in increases in negotiable certificates of deposits (NCDs), followed by transferable deposits, currency in circulation and other deposits.

Credit to government registered an annual growth of 39.43% in September 2019, compared to 40.23% in August 2019. Annual growth in credit to the private sector stood at 76.74%, up from 63.75% in August 2019

On a month-on-month basis, broad money registered an increase of 19.59% to Z\$23.55 billion, from Z\$19.69 billion in August 2019.

The largest component of broad money was transitory or transferable deposits in domestic currency, which constituted 47.21% of total deposits, followed by foreign currency deposits at 41.86%, as shown in Figure 9.

Figure 9: Composition of Money Supply

The large share of foreign currency deposits, however, partly reflects revaluation due to exchange rate movements.

INFLATION OUTTURN

Monthly Inflation

Monthly inflation, which has been on a downward trend since June 2019, decelerated further to 17.72% in September 2019, from 18.07% in August 2019. This was underpinned by the decline in non-food inflation.

Non-food inflation stood at 16.63% in September 2019, down from 17.78% in August 2019. This was, in part, underpinned by increases in transport; and alcoholic beverages and tobacco.

Monthly food inflation, however, accelerated from 18.54% in August, to 19.54% in September 2019, on account of increases in bread and cereals, meat, vegetables and oils and fats prices. Prices of bread and mealie-meal surged, largely as a result of shortages of wheat and maize grain, respectively. Meat product prices also registered increases, particularly pork and poultry, due to the rise in the cost of stock feed.

Notes:

- (i) Depository Corporations Survey - formerly Monetary Survey.
- (ii) Broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include exclusion of Government deposits held by banks from broad money.
- (iii) Transferable deposits made up of demand and savings deposits.
- (iv) NCDs are also referred to as securities included in broad money.
- (v) All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.
- (vi) Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)
- (vii) Depository corporations made up of the Central Bank and other depository corporations
- (viii) Other depository corporations (ODCs) - Commercial banks, merchant banks, building societies and POSB.
- (ix) In December 2017, the statistics were adjusted in retrospect by reclassifying Securities issued under Afrades from claims on government to claims on central bank
- (x) In December 2017, the statistics were adjusted in retrospect by reclassifying amounts accessed by banks under the Afrades from liabilities to Other Depository corporations and Other Financial Corporations to liabilities to Central Bank
- (xi) In December 2018, statistics were revised from November 2017 due to reclassification of lines of credit (foreign liabilities) that were initially classified as deposits included in broad money
- (xii) All monetary and financial statistics are valued in ZWL\$ since the introduction of the interbank foreign exchange market in February 2019
- (xiii) In June 2019, the introduction of monocurrency resulted in the revision of Reserve Money to exclude USD denominated liabilities to ODCs.
