INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

The international price for selected precious metals, base metals and crude oil registered monthly gains in August 2020. This followed the opening up of most economies from coronavirus induced lockdowns, which boosted expectations of recovery of the global economy.

Precious Metals

Gold prices surged by 7.0% month-on-month, from US\$1,841.08 per ounce in July 2020 to US\$1,969.14 per ounce, during the month under analysis. Its firming demand was boosted by a dovish monetary policy stance taken by the US Federal Reserve, indicating a preference for growth, tolerance for higher inflation and sustained low interest rates.

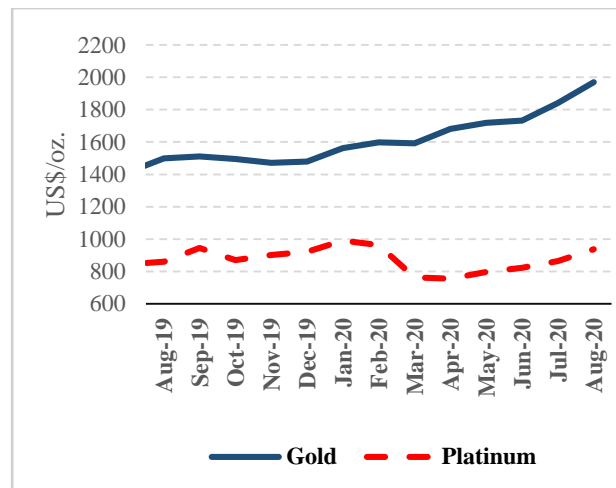

The yellow metal gained further as the US Federal Reserve's position weakened the US dollar, making US dollar denominated gold cheaper for holders of other currencies. In addition, geo-political tensions and a slower-than-expected recovery from coronavirus induced-downturn continued to boost the demand outlook for gold.

During the month of August 2020, platinum prices gained remarkably, on the back of improved investor sentiment as South Africa, the world's top producer of the precious metal lifted lockdown restrictions. Alongside the weaker US dollar, following Federal Reserve's shift in monetary policy, the demand for platinum was further enhanced. As result, the monthly average platinum price rose by 8.6% to

US\$937.69 per ounce in August 2020, from US\$863.52 per ounce in July 2020.

Figure 1 shows developments in precious metal prices for the period from August 2019 to August 2020.

Figure 1: Precious metal prices (US\$/oz.)

Base Metals

The shift in policy by the Federal Reserve supported demand for copper, as the US dollar weakened, making dollar denominated assets like the red metal cheaper for holders of other currencies. Resultantly, copper prices increased by 2.6%, from US\$6,340.72 per tonne in July to US\$6,507.71 per tonne in August 2020. However, rising tension between the US and China over the south China sea capped price gains for the base metal.

Nickel prices were bullish during the month under review, largely driven by investor optimism over the demand outlook in China. In addition, prices were also supported by a weaker US dollar. As a result, the monthly average price

of the base metal increased by 9.3%, from US\$13, 297.87 per tonne recorded in July 2020 to US\$14,533.86 per tonne, during the month under analysis.

Brent Crude Oil

The international price of Brent crude oil registered a 4.4% increase, from US\$43.10 per barrel in July 2020 to US\$44.98 per barrel in August 2020. Oil prices were boosted by a recovery in demand as economies continued to open up. In addition, production cuts by Iraq, OPEC’s second largest producer, buoyed prices from the supply-side, despite the winding down of an OPEC production cut deal in August 2020.

Gains in the price of oil, however, were capped by uncertainty as economic activity in major economies was slower than expected, increasing the likelihood of oversupply conditions in the oil market.

MERCHANDISE TRADE DEVELOPMENTS

Merchandise trade¹ for the month of August 2020 amounted to US\$774.7 million, representing a 22.5% monthly increase from US\$632.2 million recorded in the previous month. The modest recovery in total merchandise trade was on account of improvements in both merchandise exports and imports, as economies continued to open up from coronavirus induced lockdowns, heightening expectations of recovery in global trade.

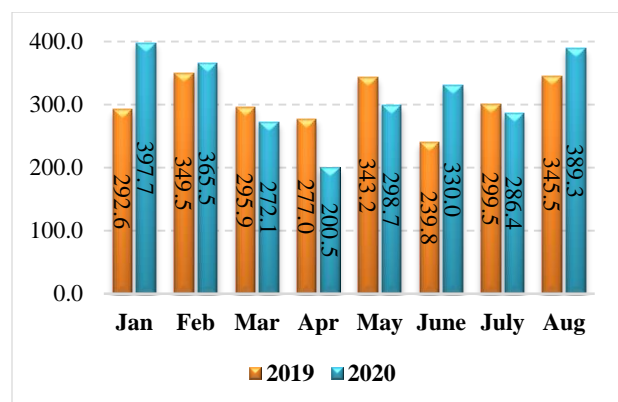

Merchandise Exports

The country’s merchandise exports grew by a marked 35.9%, from US\$286.4 million in July 2020 to US\$389.3 million in August 2020. Compared to the same month in 2019, the outturn was 12.7% higher. The nascent

¹ The sum of exports and imports

improvement in the country's export earnings was underpinned by the recovery of commodity prices from the low levels experienced during the coronavirus induced lockdowns. Figure 4 shows developments in the country's merchandise exports for the month under analysis.

Figure 4: Merchandise Exports (US\$ m)

Source: ZIMSTAT, 2020

Noticeable increases in exports were recorded for nickel, gold and tobacco owing to a recovery in most commodity prices. In particular, gold prices significantly increased on account of strong investment demand from investors seeking a safe haven to hedge against the impact of the global health pandemic. Table 1 shows merchandise exports for the months of July and August 2020.

Merchandise Imports

Merchandise imports amounted to US\$385.4 million in August 2020, representing a 11.5% increase from US\$345.8 million recorded in the previous month. Figure 6 shows merchandise imports for 2019 and 2020.

Figure 6: Merchandise Imports classified by HS Codes 2019 & 2020 (US\$ m)

The upsurge in monthly imports during the month of August 2020 was occasioned by increases in the importation of medicines, crude soya bean oil and rice. Fuel imports, however, declined during the month under review, with unleaded petrol and diesel falling by 67.8% and 47.7%, respectively.

Table 2 shows imports of major commodities for the months of July and August 2020.

Merchandise Trade Balance

The country's net external trade position reverted to a surplus in August 2020, after six months of consecutive deficits. The trade balance improved from a deficit of US\$59.3 million in July to a surplus of US\$3.9 million, during the month under review. MONETARY DEVELOPMENTS³

Broad money stood at ZW\$146.15 billion as at end August 2020, up from ZW\$132.26 billion recorded in July 2020. The money stock (M3) largely consisted of foreign currency account (FCA) deposits, equivalent to ZW\$86.01 billion (58.85%), while local currency transferrable deposits amounted to ZW\$59.05 billion (35.93%) and currency in circulation, ZW\$1.08 billion (0.74%).

Over the year to August 2020, the foreign currency component of total deposits increased significantly, mainly on account of revaluation adjustments due to exchange rate movements. The exchange rate moved from ZW\$10.71 per US\$1 in August 2019 to ZW\$83.40 per US\$1 in August 2020.

Local currency deposits registered a year-on-year growth of 340.83%, while currency in circulation also increased by 92.77%, on an annual basis.

Figure 9: Composition of Money Supply

Source: Reserve Bank of Zimbabwe, 2020

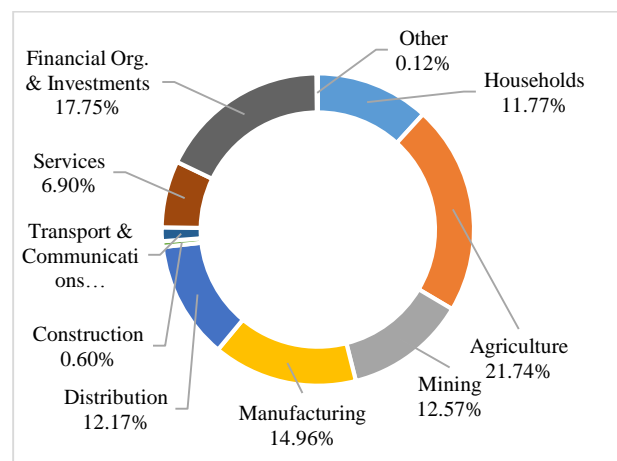

³All monetary numbers valued in ZW\$ since the adoption of an interbank market determined exchange rate in February 2019.

The annual growth in broad money reflected increases in credit to the private sector, 664.70%; credit to public non-financial corporations, 298.80%; and credit to other financial corporations, 97.32%. Partially offsetting these increases, was a decline of 4.53% in net credit to Government. The decrease in net credit to Government was largely due to the increase in government deposits held by banking institutions.

On a month-on-month basis, credit to the private sector increased by 17.78% to ZW\$46.64 billion; while net credit to Government declined by 17.52% to ZW\$11.94 billion in August 2020.

Credit to the private sector was mainly extended towards agriculture, 21.74%; financial organisations, 17.75%; manufacturing, 14.96%; mining, 12.57%; distribution, 12.17%; and households, 11.77%; as shown in figure 10.

Figure 10: Distribution of Private Sector Credit

Source: Reserve Bank of Zimbabwe, 2020

Credit to the private sector was channelled towards inventory build-up, 34.43%; other recurrent expenditures, 31.45%; and fixed capital investment, 17.52%, among other purposes.

STOCK MARKET DEVELOPMENTS

On Friday 26th June 2020, Government announced the suspension of trading on the Zimbabwe Stock Exchange (ZSE). The move was aimed at curtailing potential destabilization of the economy due to massive speculative trading on the local bourse. As such, the ZSE witnessed no trading activity throughout the month of July 2020.

Trading resumed on the 3rd August 2020 amid depressed activity. As a consequence, all the major indices registered significant losses. During the period 26th June 2020 to 31st August 2020, the All Share, Top 10, industrial and mining indices shed 22.34%, 25.88%, 22.77% and 7.17% to close at 1 389.23 points, 913.71 points, 4 533.79 points and 3 709.15 points, respectively.

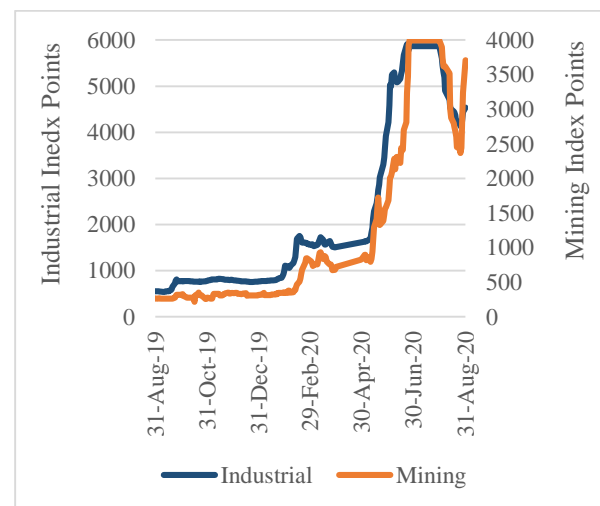

Figure 11: Zimbabwe Stock Exchange All Share and Top 10 Indices

On an annual basis, however, the All Share, Top 10, industrial and mining indices gained 735.07%, 517.12%, 718.98% and 1 276.05%, up from 166.36 points, 148.06 points, 553.59 points and 269.55 points recorded in August 2019, respectively.

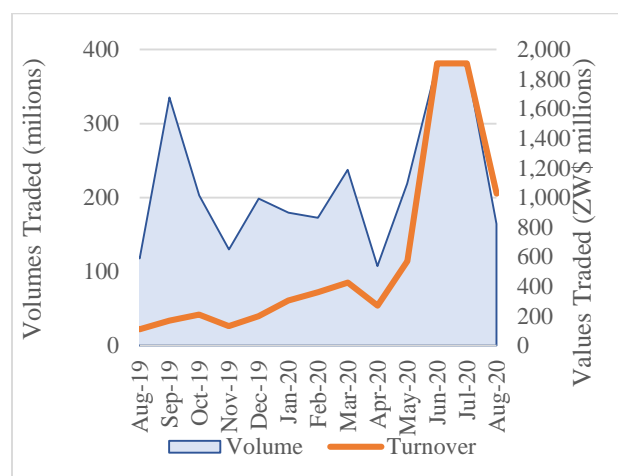

Figure 12: Zimbabwe Stock Exchange Indices

The volume and value of shares traded at the ZSE declined by 56.70% and 46.16% to close at 164.50 million shares and Z\$1.03 billion, respectively.

Figure 13: ZSE Monthly Volumes and Values Traded

The ZSE market capitalization lost Z\$52.90 billion, or 23.14%, from Z\$228.58 billion in June 2020 to Z\$175.68 billion. On a year-on-year basis, the local bourse capitalization increased by 708%, from Z\$21.74 billion recorded in August 2019.

INFLATION OUTTURN

Annual Inflation

Annual headline inflation stood at 761.02% in August 2020. This represented a 76.51 percentage points decline from 837.53% in July 2020. This was driven by increases in both food and non-food inflation. The deceleration in

⁴The Zimbabwe National Statistical Agency (ZIMSTAT) commenced publication of the blended CPI inflation in June 2020. The blended CPI inflation combines the average changes

annual inflation in August 2020 followed the relatively stable exchange rate.

Annual food inflation, decelerated from 976.73% in July 2020 to 865.48% in August 2020. Vegetables; bread and cereals; and meat, had the highest contribution to food inflation, during the month under review.

Year-on-year annual non-food inflation eased from 755.27% in July 2020 to 698.90% in August 2020. Increases in housing, water, electricity, gas and other fuels; miscellaneous goods and services; and transport prices continued to have knock-on effects on non-food inflation.

The annual Blended Consumer Price Index inflation⁴ eased to 420.9% in August 2020, from 485.27% in July 2020. This was attributed to price declines for all categories, except health and education.

Monthly Inflation

Month-on-month, the ZW\$ inflation fell to 8.44% in August 2020, from a peak of 35.53% in July 2020. This followed the deceleration in both food and no food inflation.

Month-on-month food inflation decelerated from 37.99% in July 2020 to 6.30% in August 2020. Vegetables; bread and cereals; and meat continued to have the largest impact on monthly inflation.

Monthly non-food inflation decelerated from 33.76% in July 2020 to 10.03% in August 2020, on account of declines in communication, transport, and clothing and foot wear, among

in price of goods and services sold in the two main currencies in circulation, namely the ZW\$ and the US\$.

others. Education inflation, however, increased largely in line with hikes in fees for university education as well as private college fees.

Blended monthly inflation decelerated further to 1.41% in August 2020, from 16.65% in July 2020.

Figure 14 shows month-on-month inflation developments for the period from July 2019 to July 2020.

Notes:

- (i) Depository corporations survey - formerly Monetary Survey.
- (ii) Broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include exclusion of Government deposits held by banks from broad money.
- (iii) Transferable deposits made up of demand and savings deposits.
- (iv) NCDs are also referred to as securities included in broad money.
- (v) All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.
- (vi) Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)
- (vii) Depository corporations made up of the Central Bank and other depository corporations
- (viii) Other depository corporations (ODCs) - Commercial banks, merchant banks, building societies and POSB.
- (ix) In December 2017, the statistics were adjusted in retrospect by reclassifying Securities issued under Afrades from claims on government to claims on central bank
- (x) In December 2017, the statistics were adjusted in retrospect by reclassifying amounts accessed by banks under the Afrades from liabilities to Other Depository corporations and Other Financial Corporations to liabilities to Central Bank
- (xi) In December 2018, statistics were revised from November 2017 due to reclassification of lines of credit (foreign liabilities) that were initially classified as deposits included in broad money
- (xii) All monetary and financial statistics are valued in ZWL\$ since the introduction of the interbank foreign exchange market in February 2019
