INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

During the month of May 2020, average international prices of gold, platinum, copper, nickel, and Brent crude oil increased.

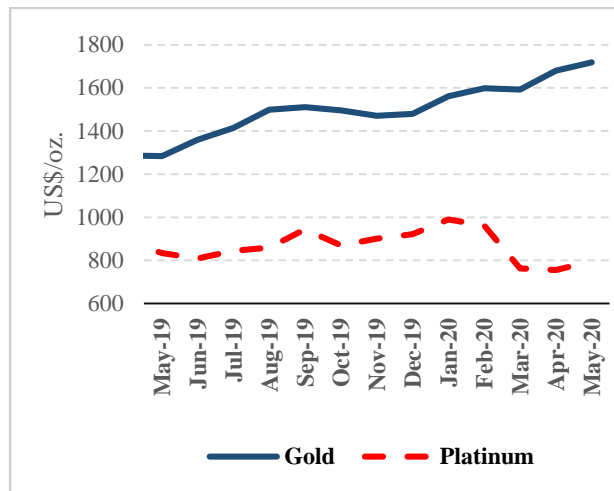

Precious Metals

Prices of gold increased by 2.3% month-on-month, from US\$1,680.18 per ounce in April 2020 to US\$1,718.19 per ounce, during the month under analysis. The increase was largely underpinned by robust safe-haven demand, on the back of uncertainties over the impact of the coronavirus pandemic.

Platinum prices gained 5.4% on a monthly basis, from US\$755.45 per ounce in April 2020 to US\$795.89 per ounce in May 2020. The resumption of operations in Europe and the US as well as plans by major producers in Asia to open economies boosted demand prospects for the precious metal. In addition, the implementation of World Health Organisation guidelines, to contain the spreading of COVID-19 in top platinum producing countries such as South Africa, in part, limited mining operations leading to constrained global supply.

Figure 1 shows the developments in precious metal prices for the period from May 2019 to May 2020.

Base Metals

The average prices of copper rose by 4.0% to close at US\$5,234.42 per tonne, during the month under review. Optimism about higher demand supported the rebound in copper prices, following the slump registered in April 2020.

Similarly, nickel prices registered a monthly increase of 3.5%, from US\$11,741.13 per tonne in April 2020, to close at US\$12,151.00 per tonne in May 2020. Prices were boosted by higher demand prospects. In addition, the Philippines and Indonesia, the key producers of the base metal, also announced plans to open-up their economies, during the month under review.

Figure 2 shows the evolution of base metal prices for the period from May 2019 to May 2020.

Brent Crude Oil

Brent crude oil prices increased by 21.1%, from US\$26.54 per barrel in the previous month to US\$32.12 per barrel, during the month, under analysis. Prices increased on account of higher demand, following the easing of lockdown restrictions in a number of countries. Supply, however, remained constrained due to OPEC output cuts.

MERCHANDISE TRADE DEVELOPMENTS

Total merchandise trade¹ for the month of May 2020 amounted to US\$659.8 million, an increase of 55.1%, from US\$425.5 million recorded in the previous month. This was mainly on account of increases in both merchandise exports and imports. The rise in merchandise trade was on the back of the easing of trade restrictive lockdowns by most economies including South Africa, the country's biggest trading partner.

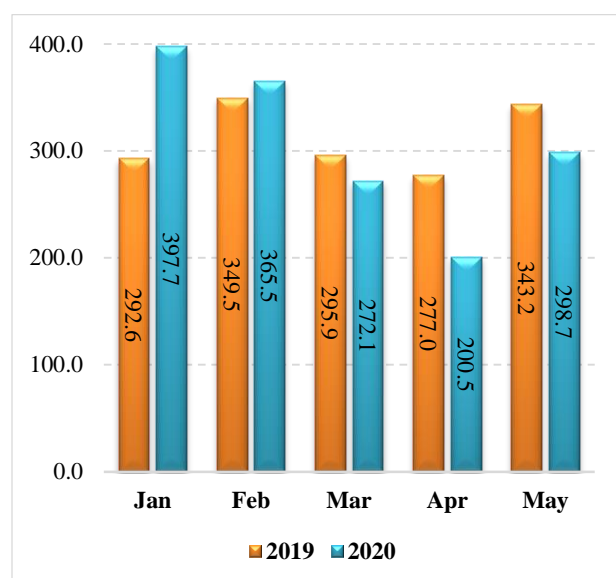

Merchandise Exports

Merchandise exports rose by 49.0%, from US\$200.5 million in April 2020 to US\$298.7 million in May 2020. The improvement in the country's exports was largely on account of easing of lockdown measures, particularly in

South Africa and China, the country's major export markets for minerals and tobacco.

During the period under analysis, the country's merchandise exports were dominated by gold, nickel, tobacco and platinum, which collectively contributed about 80.8% of total exports, as shown in Table 1.

Merchandise Imports

Total merchandise imports for the month of May 2020 amounted to US\$361.1 million, a 60.5% increase from US\$225.0 million recorded in April 2020. The rebound in imports was attributed to relaxation of lockdowns in most economies, a development that resulted in improved activity in regional and global supply chains. MONETARY DEVELOPMENTS³

Broad money amounted to ZW\$59.48 billion as at end of May 2020. The broad money stock was largely made up of local currency deposits, ZW\$33.16 billion (56.10%), and foreign currency deposits ZW\$24.98 billion (42.01%). Currency in circulation stood at ZW\$1.13 billion, accounting for about 1.89% of broad money.

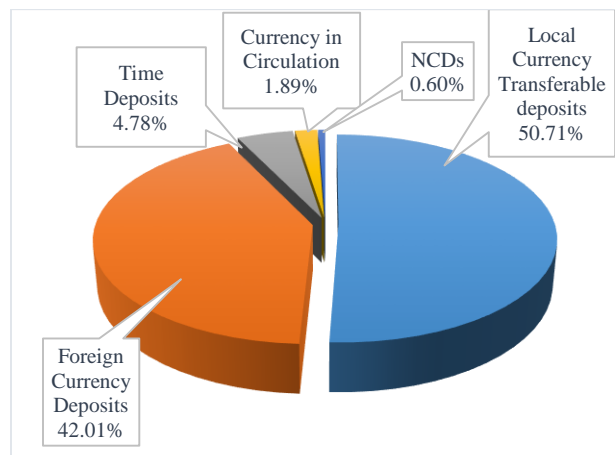

Over the year to May 2020, foreign currency deposits grew by 724.15%, partly attributable to revaluation adjustments due to exchange rate movements, from ZW\$5.26 per US\$1 in May 2019 to ZW\$25 per US\$1 in May 2020. The foreign currency deposits in the banking system

³All monetary numbers valued in ZW\$ since the adoption of an interbank market determined exchange rate in February 2019.

also increased due to inflows from the tobacco selling season, as well as the harnessing of foreign currency into formal channels, following the policy to allow use of free funds to settle domestic transactions.

On the other hand, the local currency component of deposits recorded a year-on-year growth of 250.76%, owing to normal money multiplier effects in the economy. Currency in circulation increased by 141.96% to ZW\$1.13 billion, over the year to May 2020. Figure 9 shows broad money components as at end of May 2020.

Figure 9: Composition of Money Supply

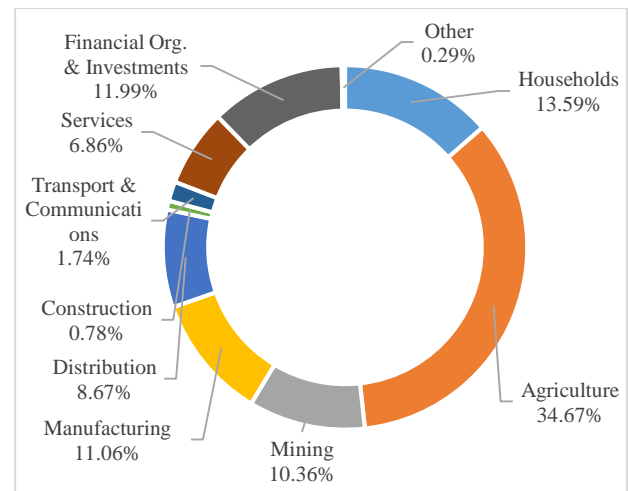

Source: Reserve Bank of Zimbabwe, 2020

On a year-on-year basis, growth in broad money was largely driven by increases of 388.57% in credit to the private sector and 59.25% in net credit to Government. The increase in net credit to government largely reflected holdings of Treasury bills by the banking system.

Month-on-month, credit to the private sector grew by 17.00% to ZW\$21.58 billion, while net credit to Government increased by 38.52%, to ZW\$14.28 billion.

Credit to the private sector was mainly channelled towards agriculture, 34.67%; households, 13.59%; financial organisations, 11.67%; manufacturing, 11.06%, mining, 10.36% and distribution, 8.67% as shown in Figure 10.

Figure 10: Distribution of Private Sector Credit

Source: Reserve Bank of Zimbabwe, 2020

Credit to the private sector was largely utilised for inventory build-up, 36.62%; other recurrent expenditures, 29.76%; and fixed capital investment, 21.98%, among other purposes.

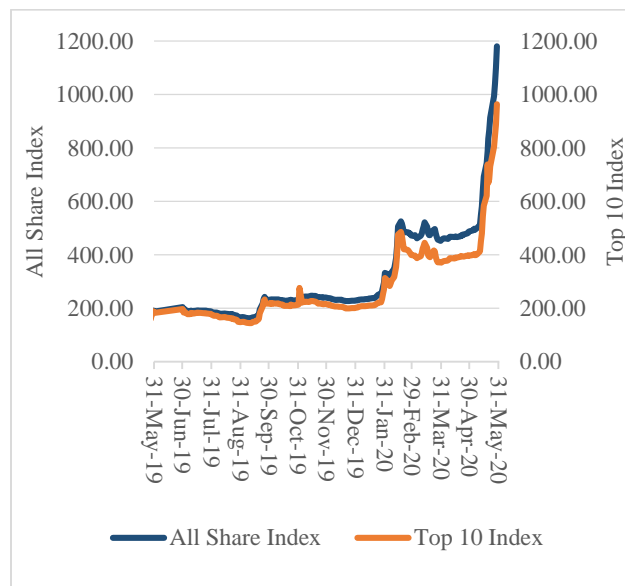

STOCK MARKET DEVELOPMENTS

ZSE market capitalization gained ZW\$89.33 billion, or 140.93% of the previous month's value, to close at ZW\$152.72 billion. On an annual basis, local bourse capitalization also surged by ZW\$127.80 billion, from ZW\$24.92 billion recorded in May 2019.

INFLATION OUTTURN

Annual Inflation

Annual headline inflation accelerated further to 785.55% in May 2020, from 765.6% recorded in April 2020. This was underpinned by increases in both food and non-food inflation.

Annual food inflation decelerated marginally, from a peak of 980.03% in April 2020 to 953.34% in May 2020.

Non-food inflation, however, accelerated to 700.38% in May 2020, from 663.66% recorded in April 2020.

The benchmarking of prices on the parallel market exchange rate, in large part, explained the increase in prices of both imported and locally produced food and non-food items.

Monthly Inflation

Monthly inflation decelerated further to 15.13% in May 2020, from 17.6% in April 2020, mainly due to a decline in food inflation.

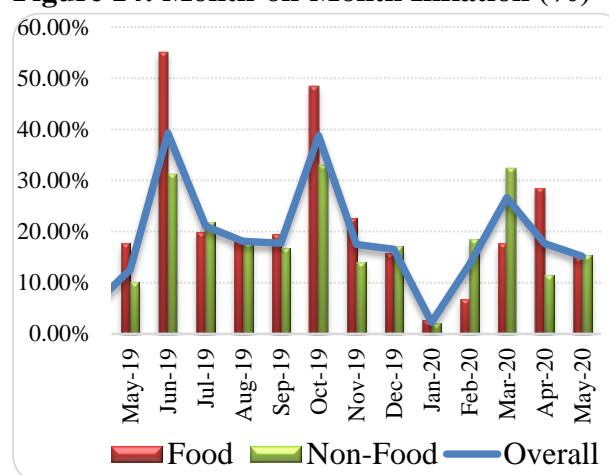

Monthly food inflation fell to 14.72% in May 2020, from 28.4% in April 2020, on account of declines in all sub-categories, except fruits and vegetables, which registered slight increases

over the month. The declines are attributed to waning demand, occasioned by a fall in real incomes.

Monthly non-food inflation, however, accelerated to 15.41% in May 2020, from 11.4% in April 2020. This was due to increases in transport; hotels and restaurants; and miscellaneous goods and services, among others. Declines in health; furniture, household equipment and maintenance; and education partially offset the increases.

Figure 14 shows month-on-month inflation developments, for the period from May 2019 to May 2020.

167.6 million transactions, during the same month.

Zimbabwe Electronic Transfer Settlement System (ZETSS)

previous month.
