OVERVIEW

The annual headline inflation increased to 21.6% in November 2023 reflecting a 3.8 percentage point gain from the 17.8% recorded in October 2023. The increase was attributed to both food and non-food inflation.

On a month-on-month basis, broad money rose by 4.99% in November 2023, compared to 6.85% in October 2023. The monthly increase in money supply is largely attributed to the expansion of 15.80% in the local currency component thereby reflecting credit creation by the banking sector.

The average international prices for palladium, nickel, Brent crude oil and lithium declined, while gold, platinum, and copper prices increased. Prices were weighed down by a stronger U.S. dollar.

The country exported merchandise worth US\$681.4 million in November 2023, whilst merchandise imports amounted to US\$827.3 million. This culminated in a trade deficit of minus US\$145.9 million.

During the month of November 2023, the Zimbabwe Stock Exchange (ZSE) exhibited bullish sentiments. As such, All Share, Top 10, Top 15, Small Cap and Medium Cap indices gained 21.76%, 16.90%, 18.24%, 4.98% and 32.62% respectively.

The Victoria Falls Stock Exchange (VFEX) traded in a positive trajectory during the month of November 2023. As such, the All-Share index gained 1.85% to close at 69.07 points, from 67.81 points recorded in October 2023.

The value of transactions processed through the National Payment Systems (NPS) increased to ZW\$37.57 trillion in November 2023, from ZW\$32.53 trillion in the previous month.

The volumes of NPS transactions registered an increase of 3% from 62.69 million in the previous month to 64.45 million during the month under review.

INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

The average international prices for palladium, nickel, Brent crude oil and lithium decreased, whilst gold, platinum, and copper prices increased. A relatively stronger U.S. dollar largely weighed down commodity prices.

Precious Metals

Gold

Gold prices increased by 3.71%, from US\$1,912.98 per ounce reported in October 2023 to US\$1,983.95 per ounce in November 2023. The increase in gold prices was primarily driven by the weakening of the U.S. dollar, which made precious metals more attractive to investors seeking a secure store of value and investment options. Investors turned to gold as a haven and a reliable store of value.

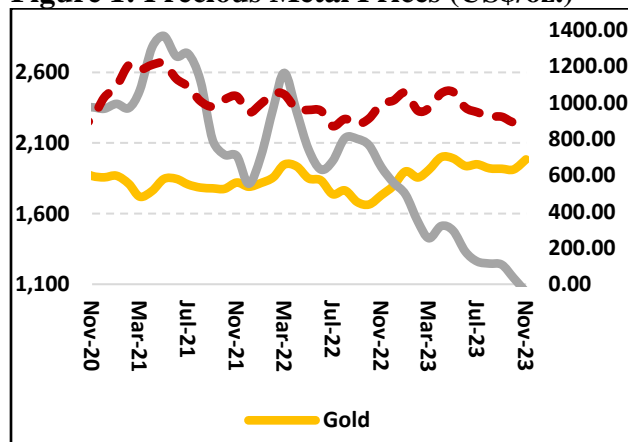

Platinum

Platinum prices registered a 1.84% increase from US\$891.91 per ounce in October 2023 to US\$908.30 per ounce in November 2023. The upward movement in prices was primarily driven by market speculation, suggesting that the Federal Reserve was approaching the conclusion of its cycle of raising interest rates.

Palladium

Palladium prices significantly declined due to the initial market shock caused by widespread expectations of an oversupply as electric vehicle adoption increases and automakers opt for platinum over palladium for their catalytic converters. Prices fell by 8.59% to US\$1,045.73 per ounce during the reporting month, compared to US\$1,144.02 per ounce recorded in October 2023.

Base Metals

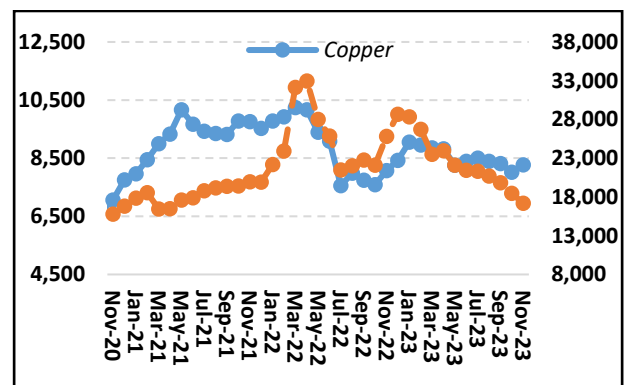

Copper

During the month under analysis, copper prices gained by 3.18%, from US\$8,017.45 per tonne recorded in the previous month to US\$8,272.39 per tonne. Strong demand in China, the largest metals consumer and decreased inventories supported the prices of the red metal.

Nickel

Nickel prices fell by 6.96%, from US\$18,492.27 per tonne recorded in the previous month to US\$17,204.77 per tonne, during the month under analysis. Prices retreated due to waning demand, coupled with loss-making conditions from the stainless-steel sector, the main consumer of nickel, which led to wider production cuts, weighing down prices. Figure 2 shows base metals price developments from November 2020 to November 2023.

Figure 2: Base Metal Prices (US\$/ton)

Brent Crude Oil

Brent crude oil prices experienced a decline of 7.45%, from a monthly average of US\$88.67 per barrel in October 2023 to US\$82.06 per barrel in November 2023. This was, in large part, due to increasing oil supply and demand concerns.

Figure 3 shows Brent crude oil price developments for the period from November 2020 to November 2023

Lithium

In the month of November 2023, average international prices for lithium experienced a significant decline of 11.87%, from US\$23,870.45 per tonne in October 2023 to US\$21,036.36 per tonne. The decrease was primarily attributed to two factors: a slowdown in electric vehicle sales in China and an increase in the overall supply of lithium in the market.

Furthermore, the deceleration in lithium prices was also attributed to weak demand for battery cells from East Asia and Europe. The price

developments for lithium for the period from March 2023 to November 2023 are illustrated in Figure 4.

MERCHANDISE TRADE DEVELOPMENTS

The country's total merchandise trade for November 2023 stood at US\$1,508.7 million, 13.0% lower than the US\$1,734.2 million recorded in the previous month. Merchandise Exports

The country exported merchandise worth US\$681.4 million in November 2023, compared to US\$831.9 million recorded in the previous month. The decline was mainly due to decreases in gold and tobacco exports. The monthly exports for November 2023 were 10% higher than the US\$674.6 million recorded in

the corresponding month in 2022. Figure 5 shows developments in the country's merchandise exports from January 2022 to November 2023.
