## OVERVIEW

The Reserve Bank of Zimbabwe introduced the ZiG, which is a structured currency fully backed by gold, and foreign currency reserves on the 5<sup>th</sup> of April 2024. All Zimbabwe Dollar (ZW\$) balances have been converted to the new currency. The prices of goods and services have also shifted from ZW\$ to ZiG. Prices and the exchange rate have remained stable under the new currency system as the outlook on economic activity becomes positive.

The Consumer Price Index (CPI) has been rebased to 100 in April 2024 following the introduction of the new currency. This implies that the estimation of monthly ZiG inflation commences in May 2024 while the publication of annual ZiG inflation figures commenced in April 2025.

The Zimbabwe Stock Exchange indices were also rebased to 100 in April 2024. Trading on the ZSE was subdued during the month under analysis due to tight liquidity conditions on the local bourse.

The Victoria Falls Stock Exchange (VFEX) was bearish during the month of April 2024. Consequently, the All-Share index lost 0.44% to close at 100.62 points, compared to 101.06 points recorded in April 2024.

The value of transactions processed through the National Payment Systems (NPS) stood at ZiG66.93 trillion during the month of April 2024. NPS transaction volumes decreased by 43% to close at 38.65 million, from 68.31million recorded in March 2024.

On the external front, the country's total merchandise trade for the month of April 2024 stood at US\$1,288.0 million which is 2.57% higher as compared to the US\$1,255.7 million recorded in the previous month. The increase in total trade can be attributed to an increase in imports during the reporting period.

## INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

During the month of April 2024, the international prices for several commodities firmed, driven by higher demand. Table 1 shows the evolution in the international prices of selected commodities during the month under analysis.

### Gold

Gold prices averaged US\$2,333.14 per ounce in April 2024, which is an increase of 8.19%, from US\$2,156.49 per ounce in March 2024. The increase in price was supported by an increase in safe-haven appeal for gold and rising investor expectations of a U.S. interest rate cut.

## Platinum

Platinum prices increased by 3.36%, from an average of US\$911.08 per ounce in the previous month to US\$941.68 per ounce during the reporting month. This was, mainly on account of a combination of stronger demand, sector rebound expectations, speculation on future demand, and increasing expectations for monetary policy easing by the US Fed.

## Palladium

Palladium prices marginally increased by 0.01%, from US\$1,016.08 per ounce in the previous month to close the month under analysis at US\$1,016.08 per ounce, driven by a brighter demand outlook from the auto industry. The price trends of precious metals from March 2021 to April 2024 are shown in Figure 1.

## Brent Crude Oil

During the month of April 2024, Brent crude oil prices firmed by 5.12%, from an average of US\$84.62 per barrel in March 2024, to

US\$88.96 per barrel. The increase in oil prices was largely attributable to the persistence of geopolitical tensions in Europe and the Middle East and concerns over supply constraints and rising speculation about higher global demand. Figure 2 shows developments in oil prices for the period from April 2021 to April 2024.

## Copper

During the month of April 2024, copper prices surged by 9.04%, from US\$8,796.98 per tonne recorded in the prior month to US\$9,592.53 per tonne during the month under analysis. Prices were largely supported by tight supply conditions.

## Nickel

Nickel prices firmed by 4.02%, from a monthly average of US\$17,645.03 per tonne recorded in March 2024, to US\$18,353.90 per tonne, during the month under analysis. This followed speculation about rising demand for stockpiling

in China. Figure 3 shows base metals price developments for the period from April 2021 to April 2024.

### Merchandise Trade Developments

On a year-on-year basis, total merchandise trade surged by 1.9% from US\$1,263.5 million recorded in the corresponding month in 2023.

### Merchandise Exports

During the month of April 2024, the country exported merchandise worth US\$515.5 million representing a decline of 3.6% from US\$534.7 million recorded in the previous month. The decrease in merchandise exports was largely driven by a fall in industrial diamond exports. On a year-on-year basis, monthly exports for April 2024 were 7.2% lower than the US\$555.5 million recorded in the corresponding month in 2023. Figure 5 shows developments in the country's merchandise exports for 2023 and 2024.
