OVERVIEW

The ZiG monthly inflation rate for December 2025 slightly increased to 0.23% from 0.20% recorded in November 2025. In contrast, the year-on-year ZiG inflation rate decreased to 15.0% in December 2025 from 19.0% in November 2025.

Broad money (M3) stock, which consists of both local and foreign currency deposits, stood at ZiG108,088.71 million in December 2025, an increase of 2.39%, from ZiG105,562.65 million recorded in November 2025.

The Zimbabwe Stock Exchange (ZSE) and the Victoria Falls Stock Exchange exhibited bullish sentiments during the month under review.

The total digital payment systems transaction values for December 2025 increased by 23% from ZiG224.01 billion in November 2025 to ZiG275.38 billion. Similarly, transactional volumes also increased by 11% from 76.22 million to 84.23 million recorded during the same period.

International commodity prices for most selected commodities strengthened in December 2025. Brent crude oil prices, however, retreated.

The country's merchandise exports totalled US\$ 1,141.7 billion against an import bill of US\$901.5 million, resulting in a trade surplus of US\$240.2 million.

INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

International commodity prices for most selected commodities increased in December

2025. Prices rose as safe-haven and investment demand firmed, underpinned by geopolitical risks, supply constraints, regulatory-driven industrial demand, and expectations of lower U.S. interest rates. Brent crude oil prices, however, declined as supply fears eased, amid strong expectations of a US-led ceasefire between Russia and Ukraine.

The price developments for selected commodities in the month are shown in Table 1.

Gold

In the month of December 2025, gold prices averaged US\$4,308.96 per ounce, an increase of 5.28% from US\$4,092.92 per ounce recorded in November 2025. The increase in prices was fuelled by safe-haven demand for the yellow metal, amid escalating geopolitical tensions.

Platinum

During the month under review, average platinum prices rose by 19.99% to US\$1,887.12 per ounce, from US\$1,572.75 per ounce recorded in the previous month. The precious metal has increasingly served as a

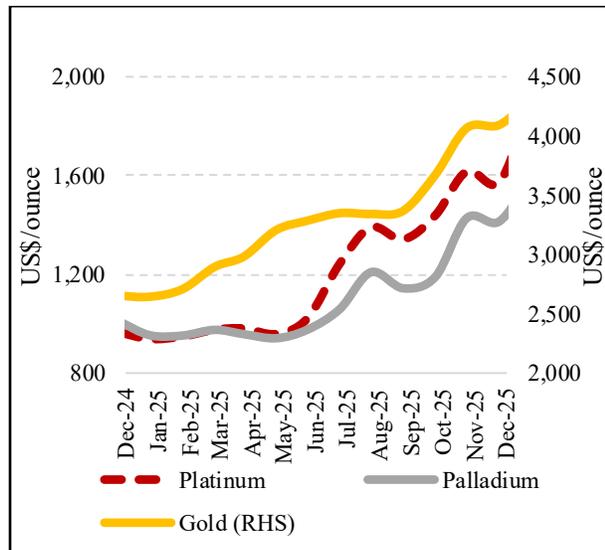

cost-effective substitute for gold among jewellery consumers, bolstering its price resilience, amid rising gold prices. South African platinum mines, which account for the largest share of global platinum production, continued to face operational challenges, reducing global output and contributing to the price increase.

Palladium

Average monthly palladium prices firmed by 12.50% to US\$1,590.24 per ounce, from US\$1,413.53 per ounce recorded the previous month. Prices increased as global regulatory pressure to tighten emissions standards boosted palladium use in new vehicles, thereby driving demand as automakers installed more catalytic converters.

The price movement over the period from December 2024 to December 2025 is illustrated in Figure 1.

Brent Crude Oil

Brent crude oil prices declined by 2.55%, from US\$63.28 per barrel in November 2025 to US\$61.66 per barrel, during the month under review. This followed the resumption of production in Iraq’s major oilfields which eased supply disruption premiums. In addition, the anticipated impact of the U.S.-led diplomatic efforts for a Russia-Ukraine ceasefire boosted investor expectations of future oil supply increases, exerting downward pressure on prices.

Figure 2 depicts the Brent Crude Oil price movements from December 2024 to December 2025.

Copper

Copper prices firmed by 8.69% to US\$11,762.67 per tonne in December 2025, from US\$10,822.53 per tonne recorded in the previous month. Low warehouse inventories and withdrawals of physical copper stocks created tight supply conditions that spurred

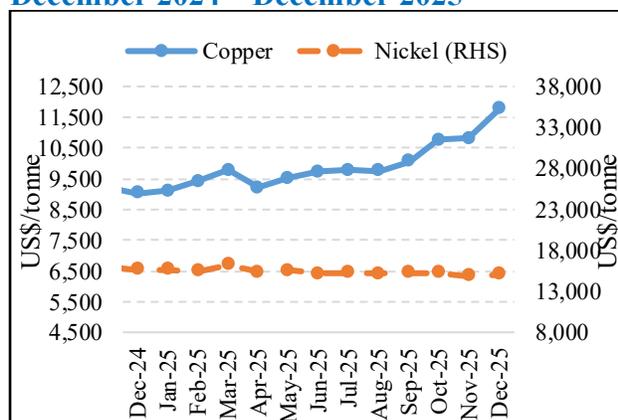

competition among buyers for the red metal. Persistent supply constraints, coupled with the growing demand for copper from Artificial Intelligence data centres and advanced technologies, further supported the price increase. Global investment in power grids, data centres, electrification projects, and construction also sustained the elevated demand for copper.

Nickel

Nickel prices rose by 1.33% to US\$15,067.19 per tonne, during the month under review, from US\$14,869.30 per tonne recorded in the prior month. The uptick was driven by seasonal production cycles in major nickel-producing regions, particularly the Philippines, which temporarily reduced ore supply and tightened market supply. Announcements and policy signals from Indonesian authorities regarding the 2026 nickel output cuts, to support prices, heightened investor expectations of a tighter market.

Lithium

During the reporting period, lithium prices strengthened by 7.78% to US\$10,905.71 per tonne, from US\$10,118.50 per tonne recorded in the previous month. Prices rose amid China’s energy storage boom and tight supply, boosting demand expectations for lithium. Moreover, robust global electric vehicle production growth, especially in China, Europe, and the U.S., continued to drive demand, pushing lithium prices higher.

Figure 4 depicts the changes in lithium prices for the period from December 2024 to December 2025.

Merchandise Trade Developments

Zimbabwe’s total merchandise trade increased by 2.1% to US\$2.04 billion in December 2025, from US\$2.00 billion recorded in November 2025. This was driven by the significant increase in exports during the month under analysis. On a year-on-year basis, total merchandise trade rose by 29.2% to US\$1.58 billion in December 2024.

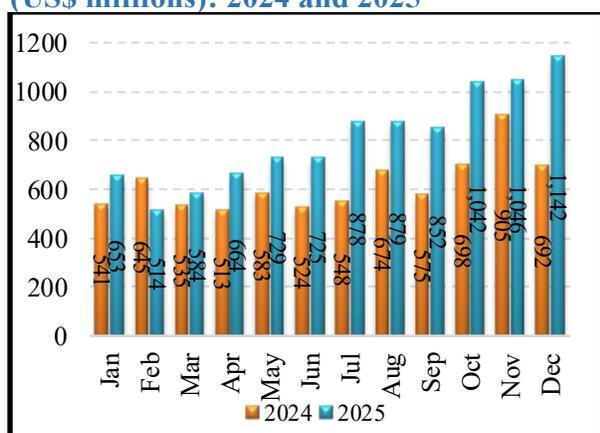

Merchandise Exports

During the month under review, the country's merchandise exports totalled US\$1.14 billion, up by 9.1% from US\$1.05 billion recorded in November 2025. Growth was underpinned by increases in exports of gold, Platinum Group Metals (PGMs), and other mineral products. Gold exports rose by 21.7% to US\$539.6 million in December 2025, from US\$443.3 million in November 2025, and accounted for about 47.3% of total exports. Similarly, PGM exports rose to US\$209.2 million from US\$192.2 million in the prior month.

On an annual basis, exports in December 2025 were 64.9% higher than the US\$692.4 million recorded in the corresponding month in 2024.

Notes:

- (i) Depository corporations survey - formerly Monetary Survey.
- (ii) Broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include exclusion of Government deposits held by banks from broad money.
- (iii) Transferable deposits made up of demand and savings deposits.
- (iv) NCDs are also referred to as securities included in broad money.
- (v) All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.
- (vi) Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)
- (vii) Depository corporations made up of the Central Bank and other depository corporations
- (viii) Other depository corporations (ODCs) - Commercial banks, merchant banks, building societies and POSE.
- (ix) In December 2017, the statistics were adjusted in retrospect by reclassifying Securities issued under Afrimdes from claims on government to claims on central bank
- (x) In December 2017, the statistics were adjusted in retrospect by reclassifying amounts accessed by banks under the Afrimdes from liabilities to Other Depository corporations and Other Financial Corporations to liabilities to Central Bank
- (xi) In December 2018, statistics were revised from November 2017 due to reclassification of lines of credit (foreign liabilities) that were initially classified as deposits included in broad money
- (xii) All monetary and financial statistics are valued in ZWL\$ since the introduction of the interbank foreign exchange market in February 2019
- (xiii) Monetary data was revised from September 2024 following the adoption of new reporting return submitted by banks. The notable revision is on broad money stock (ΔD) which was revised downwards due to reclassification of Government foreign currency debt
- (xiv) From April 2024, amounts include Unrealised Exchange Losses pertaining to IMF SDR Drawdowns which have been reclassified from Other Assets (OIN).
- (xv) The June 2025 figure includes exchange losses related to external loans transferred to the Government, which were reclassified from Unrealised Exchange Losses in Other Items Net (OIN). The adjustment does not indicate a flow of new money.
- (xvi) Loans and Advances to Govt were revised from April 2024 to incorporate exchange losses relating to IMF SDR Drawdowns
- (xvii) Loans and Advances to Govt were further adjusted in June 2025 to include exchange rate related revaluations on external loans transferred to Govt.

Notes

i. Monetary data was revised from September 2024 following the adoption of new reporting return submitted by banks.

ii. The notable revision is on broad money stock (M3) which was revised downwards due to reclassification of Government foreign currency deposits held by banks from deposits included in broad money.
