## 1. OVERVIEW

Global economic growth is expected to slow down from an estimated 3.4% in 2022 to 3.0% in 2023. The forecast for 2023, however, remains higher than the April 2023 World Economic Outlook (WEO) forecast of 2.8%. The slower global growth rate largely reflects the impact of the stance to raise policy rates by major Central Banks. Global headline inflation declined from 8.7% in 2022 to a projected 6.8% in 2023 and 5.2% in 2024 as the tight monetary conditions in most countries take effect on inflation.

On the domestic front, economic activities picked up, particularly in the agriculture, mining as well as tourism sectors. The nascent recovery of the domestic economy was underpinned by tight monetary and fiscal policies.

Headline inflation accelerated from 87.60% in March 2023 to end the second quarter of 2023 at 175.8%. The resurgence of inflationary pressures during the second quarter was partly attributed to depreciation of the local currency, and speculative pricing.

The country's total merchandise trade amounted to US\$4,136.2 million for the period April to June 2023, representing a 10.5% increase from US\$3,742.5 million recorded in the comparable period in 2022. The increase in total merchandise trade was a result of marked increases in exports and imports during the quarter under review.

Broad money stock (M3) stood at ZW\$14 275.48 billion as at June 2023, compared to ZW\$3 195.36 billion in March 2023. This largely reflected quarterly expansion

of 502.37% and 59.31% in the foreign currency and local currency components of deposits, respectively. The increase in foreign currency deposits largely reflected valuation changes owing to exchange rate depreciation, from ZW\$929.86 per US\$1 in the quarter ended March 2023 to ZW\$5 739.80 per US\$1 in June 2023.

During the second quarter of 2023, the Zimbabwe Stock Exchange (ZSE) was characterised by bullish sentiments as investors flocked to the market for value preservation in light of the limited investment options on the money market. As a result, all major indices registered gains, with the All Share, Top 10 and Medium Cap indices increasing by 344.43%, 303.06% and 479.44% to close at 171 408.90 points, 93 034.57 points and 436 363.92 points, respectively.

The Victoria Falls Stock Exchange (VFEX) was characterized by bearish sentiments during the period under analysis. As a result, the VFEX All Share index declined by 17.25% to close the second half of 2023 at 76.17 points, from 92.04 points recorded in March 2023.

During the quarter under review, the value of transactions processed through the National Payment Systems (NPS) increased by 175% to ZW\$43.45 trillion from ZW\$15.78 trillion recorded in the previous quarter. Similarly, NPS transaction volumes also increased by 1% to 189.39 million from 187.17 million during the same period.

## 2. INTERNATIONAL ECONOMIC DEVELOPMENTS

Global economic growth is expected to slowdown from an estimated 3.4% in 2022 to a projected 3.0% in 2023 and 2024, respectively. The forecast for 2023 remains modestly higher compared to the April 2023 World Economic Outlook (WEO) projection of 2.8%. However, basing on historical trends, the growth rate is weak due to the stance of major Central Banks to raise policy rates to fight inflation. Global headline inflation declined from 8.7% in 2022 to a projected 6.8% in 2023 and 5.2% in 2024.

The balance of risks to the global growth outlook remains tilted to the downside, with potential shocks from inflation, financial sector turbulence, China's slow economic recovery, and sovereign debt distress. This calls for Central banks to restore price stability and strengthen financial supervision and risk monitoring to mitigate the envisioned risks. Table 1 shows the global and regional economic growth developments and outlook.

Economic growth for Advanced economies is forecasted to decline from the estimated 2.7% in 2022 to 1.5% in 2023. This represents a 0.2 percentage point upward revision from the April 2023 WEO projection. The 2024 forecast for advanced economies is projected to remain at about 1.4 percent. Growth rates for the Euro area and the United Kingdom are expected to fall to 0.9% and 0.4%, respectively. The United

States growth rate is projected to decline from 2.1% in 2022 to 1.8% in 2023.

Contrary to the developments in the West, growth prospects in emerging and developing Asia are expected to rise to 5.3% in 2023, from 4.5% in 2022, before moderating to 5.0% in 2024. The forecast for China remains unchanged at 5.2% for 2023 and 4.5% for 2024, but the composition of growth has changed, with consumption growth broadly in line with April 2023 WEO projections.

Real economic growth in emerging and developing Europe is projected to rise to 1.8% in 2023, reflecting a 0.6 percentage point upward revision since April, and to further increase to 2.2% in 2024. The forecast for Russia in 2023 has been revised upward by 0.8 percentage points to 1.5%, reflecting hard data, on retail trade, construction, and industrial production that points to a robust first half of the year, with a large fiscal stimulus driving that strength.

In sub-Saharan Africa, growth is projected to decline to 3.5% in 2023 before picking up to 4.1% in 2024. Nigeria's growth is also expected to gradually decline from 3.3% in 2022 to 3.2% in 2023 and 3.0% in 2024, in line with April projections. This will be mainly due to security challenges in the oil sector. South Africa's growth is expected to decrease to 0.3% in 2023 from 1.9% in 2022, mainly due to incessant power shortages. The forecast has, however, been revised upward by 0.2 percentage points since April 2023, primarily attributable to the resilience in services activity in the first quarter.

The key downside risks to global economic growth include persistent inflation, financial market repricing, the slow recovery of the

Chinese economy, increasing debt distress, and deepening geo-economics fragmentation. These risks could negatively impact global growth and trade and constrain policy responses.

## INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

During the second quarter of 2023, most selected commodity prices, except for gold and platinum, were bearish. The prices were primarily weighed down by the effect of a stronger U.S. dollar on investment demand.

**Table 2: Commodities Price developments**

### Precious Metals

Gold prices remained bullish, increasing by 4.6%, from an average of US\$1,888.56 per ounce in the first quarter to US\$1,976.20 per ounce in the second quarter of 2023. The yellow metal prices rose as concerns surrounding the political turmoil in Russia drove investment flows into safe-haven bullion, outweighing risks from the Federal Reserve's hawkish outlook.

Platinum prices rose by 3.5% to US\$1,027.78 per ounce in the second quarter of 2023, from US\$993.39 per ounce reported in the first quarter of 2023. The increase was primarily underpinned by fears of supply shortages owing to sustained power-related supply disruptions, particularly in South Africa, and rising demand for the commodity in China, the largest consumer of platinum.

Palladium prices declined by 8.1%, from US\$1,568.28 per ounce in the first quarter of 2023 to US\$1,440.98 per ounce during the reporting quarter. The decrease was due to low industrial demand for the commodity from the automotive industry amid a slowdown in global economic growth and a shift towards alternative technologies that do not rely on palladium.

**Figure 1: Precious Minerals Prices (US\$/ounce): June 2022 – June 2023**

### Base Metals

Copper prices declined by 5.2%, from US\$8,954.74 per tonne in the first quarter of 2023 to US\$8,493.41 per tonne in the second quarter. The rising global supplies weighed down on the prices of the red metal due to the ramping up of production in newly opened

mines in Peru, the lacklustre recovery of China and the prospects of more interest-rate rises in the United States.

Nickel prices retreated following reports of robust nickel supplies in Indonesia and slackening demand in China, the largest consumer of base metals. Accordingly, prices slipped by 14.1%, from a quarterly average of US\$26,198.11 per tonne in the first quarter of 2023 to US\$22,515.05 per tonne during the quarter under review.

**Figure 2: Developments in base metal prices**

### Brent Crude Oil

Brent crude oil prices edged lower during the second quarter of 2023 due to weaker-than-expected Chinese demand outweighing more robust U.S. consumer data and a more bullish supply outlook from the International Energy Agency (IEA). Prices slumped by 5.2%, from US\$82.57 in the first quarter of 2023 to an average of US\$77.96 per barrel in the second quarter of 2023.

**MERCHANDISE TRADE DEVELOPMENTS**

The country’s total merchandise trade amounted to US\$4,136.2 million during the second quarter of 2023, representing a 10.5% increase from US\$3,742.5 million recorded in the comparable period in 2022.

**Figure 4: Quarterly Merchandise Total Trade (US\$m)**

Source: Zimstat, 2023

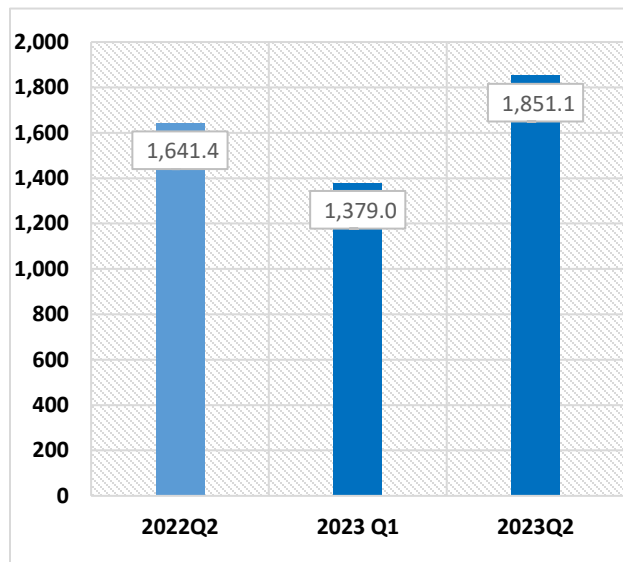

The increase in total merchandise trade was attributable to a marked increase in the country’s exports and imports.

**Merchandise Export Developments**

During the second quarter of 2023, the country’s exports amounted to US\$1,851.1 million, up 12.8% from US\$1,641.4 million in the corresponding quarter in 2022.

Similarly, the outturn for the reporting quarter was 34.2% higher than the US\$1,379.0 million realised during the first quarter of the year.

**Figure 5: Quarterly Merchandise Exports (US\$m)**

Source: Zimstat, 2023

The significant increases in gold exports underpinned the country’s export earnings during the reporting quarter. However, export earnings from PGMs were subdued, owing to tapering commodity prices on the global markets.

Table 3 shows developments in the country’s

exports for the first and second quarters of 2023.

### Major Merchandise Export Destinations

During the quarter under review, about 44.4% of the country's exports were destined for the SADC region, with South Africa absorbing (35.5%), Mozambique (6.7%) and Zambia (2.2%) of the country's total exports.

The Asian markets accounted about 42.4% of the country's exports, with the United Arab Emirates and China absorbing 27.4% and 13.2%, respectively. European markets accounted for only 3.2% of the country's

exports, with Belgium (1.6%), the Netherlands (0.8%) and Italy (0.8%) being the leading destinations in Europe.

Figure 6 depicts the country's top export destinations for the reporting quarter.

### Merchandise Import Developments

The country's import bill amounted to US\$2,285.2 million during the second quarter of the year, representing an increase of 8.8% over US\$2,101.2 million recorded during the same quarter in 2022, as shown in Figure 7.

**Figure 7: Quarterly Merchandise Imports (US\$ m)**

Source: Zimstat, 2023

Standing at \$2,285.2 during the second quarter of 2023, merchandise imports were 14.1% higher than the US\$2,003.3 million during the first quarter of the year. Energy, particularly diesel (10.6%), petrol (4.7%), and electricity (2.0%), dominated the country's imports. Other major import drivers were food imports (crude soya bean oil, wheat, and rice).

**Table 4: Quarterly Merchandise Imports (US\$m)**

## Major Import Sources

The major sources for country's imports during the second quarter of 2023 were South Africa, 37.4%; China, 17.8%; Singapore, 5.2%; Mozambique, 3.1%; India, 2.9%; Mauritius, 2.7%, the UAE, 2.2%; and Zambia, 2.1%, as shown in Figure 8.

## TRADE BALANCE

The country's trade balance improved from a deficit of US\$624.3 million in the first quarter of 2023 to a deficit of US\$434.1 million in the second quarter.

Compared to the corresponding quarter in 2022, the country's trade balance narrowed from a deficit of US\$459.8 million in 2022 to a deficit of US\$434.1 million in 2023. Figure 9 gives a comparison of the trade balances between the second quarters of 2022 and 2023.

## EXCHANGE RATE DEVELOPMENTS

The interbank exchange rate depreciated by 83.8%, from ZW\$929.86/US\$ in the first quarter of 2023 to ZW\$5,739.80/US\$ at the end of the second quarter. The parallel exchange rate depreciated from ZW\$ 1,450.00/US\$ in the first quarter of 2023 to ZW\$ 8,500.00/US\$ at the end of the second quarter of 2023. Figure 10 shows exchange rate developments from 28 February 2023 to the end of June 2023.

## 3. DOMESTIC ECONOMIC DEVELOPMENTS

### REAL SECTOR DEVELOPMENTS

Economic activities picked up in agriculture, mining, as well as accommodation and food services, among other sectors. Headline inflation increased during the quarter under review partly due to the steep depreciation of the local currency and speculative pricing.

### AGRICULTURE

Agriculture sector growth is expected to surge in 2023 following the anticipated good performance of field crops such as tobacco, cereals, and oilseeds. The good season is attributed to the evenly distributed normal to above normal rainfall received during the 2022/23 season. The livestock sub-sector is also expected to improve with adequate availability of water and grazing following the good rains and better disease control.

## Crops

Estimates from the Second Round Crop, Livestock and Fisheries Assessment Report for 2023 show a general improvement in crop performance compared to the previous season. The early onset of the rains was also suitable for timely establishment of crops.

The combined cereal output (maize, sorghum, and millets) is estimated at 2.89 million tonnes in 2023, up from 1.75 million tonnes in 2022, realising a surplus of 0.59 million tonnes on the national cereal requirement of about 2.3 million tonnes. Table 5 shows output estimates of major field crops in 2022 and 2023.

**Table 5: Estimated field crop output (tonnes)**

## Tobacco

Tobacco output is expected to reach an unprecedented 290 million kilograms in 2023, up from the 213 million kilograms achieved in 2022. The rise in tobacco output is partially

attributed to increase in area under the crop and improved financing by contractors. The good rainfall season also contributed to the record output levels.

As of 30 June 2023, the volume of tobacco sold amounted to about 283.02 million kilogrammes valued at about US\$856.52 million. Table 6 summarises the tobacco sales statistics at end of June 2023.

**Table 6: Cumulative Tobacco Sales in 2022 & 2023**

Average Price (US\$/Kg)	3.04	3.03	-0.33

## Wheat

The area planted to wheat in the 2023 season is estimated at around 90,000 hectares, up from the 80,883 hectares planted in 2022. Accordingly, wheat output is projected to surpass 400,000 tonnes in 2023, up from 375,131 tonnes produced in 2022. The winter wheat crop also benefited from the dedicated and stable power supply during the growing season.

## Maize

National maize production in the 2022/23 season is estimated 2,298,281 tonnes, up 58% from the previous season. Table 7 summarizes maize production trends since 2020.

**Table 7: Maize production trends**

Season	Area (ha)	Output (ton)	Yield(t/ha)

### Livestock

The 2023 Second Round Crop, Livestock and Fisheries Assessment Report put livestock condition in the fair to good category for most parts of the country. Following the good rains during the 2022/23 season, water and grazing availability were adjudged to be adequate to last beyond the third quarter of 2023.

### Cattle

The country's beef herd in 2023 is estimated at 5,642,400 cattle, up 2.5% from 5,509,983 head in the last year, with improvements in disease control resulting in lower mortality rates. The steady rise in cattle population since 2021 is partially attributed to implementation of government programmes to curb tick borne diseases, which include the rollout of tick grease and resuscitation of communal cattle dipping.

Cattle slaughters at formal abattoirs in the second quarter of 2023 stood at 91,698, up from 82,323 head in the same period in 2022 and 4.98% higher than the 87,352 slaughters in the previous quarter. Table 8 shows the total number of cattle slaughters at formal abattoirs

in the first and second quarters of 2023.

### Pigs

Pig slaughters at 58,773 head in the second quarter of 2023 increased by 7.55% from the 54,647 head in the same period in 2022. Pig slaughters decreased by 4.2% in the second quarter of 2023 from 61,384 to 58,773, as shown in Table 9.

### Dairy

Total fresh milk output in the second quarter of 2023 is estimated at 23.80 million litres, up 1.28% from the 23.50 million litres produced in the same period in 2022. On a quarter-to-quarter basis milk output also increased by 5.70%.

Figure 11 shows the quarterly milk production in 2022 and 2023.

## MINING

The mining sector performance in second quarter of 2023 was mixed. Gold, graphite, vermiculite, and chrome output in the second quarter of 2023 surpassed the first quarter output. Notable declines were, however, recorded in diamonds and lithium output.

Table 10 shows developments in mineral output volumes during the first quarter of 2023 and the second quarter of 2023.

## Gold

Gold output in second quarter 2023 stood at 8,567.9 kgs, which is about 11% higher than 7,708.93 kgs produced in first quarter 2023. The second quarter 2023 output is, however, 12% lower than gold which was produced during the comparable period in 2022. Gold output benefited from increased output from both the artisanal small-scale miners and large-scale miners whose output increased by 35% and 20%, respectively.

During the quarter under review, artisanal small-scale miners were the major driver of gold, contributing about 58% of total gold output. Figure 12 shows gold output performance for second quarter 2023, first quarter 2023 and second quarter 2022.

### PGMS

The major components of the Platinum Group of Metals (PGMs), platinum, palladium, and rhodium registered marginal growth of 2%, 0.4% and 0.2% in the second quarter of 2023, respectively, compared to first quarter of 2023. Platinum, palladium, and rhodium, however, recorded significant increases of 25%, 25.1% and 26%, when compared to second quarter of 2022. Figure 13 shows trends in output from major PGMs.

**Figure 13: Quarterly Trends in Platinum and Palladium Output (kg)**

Source: Ministry of Mines and Mining Development, 2023

Rhodium output increased marginally by 0.2% during the second quarter of 2023, despite softening of international commodity prices, as shown in Figure 14.

**Figure 14: Quarterly Trends in Rhodium Output (kg)**

Source: Ministry of Mines, 2023

PGM output benefitted from ongoing investment in mine development and improvement in operational efficiency at all major mining houses. Depressed commodity prices coupled with weak global demand remains a challenge for the PGMs going forward.

### Nickel

Nickel output at 4 313 tonnes in the second quarter of 2023 is 19% above output in the first quarter of 2023 and was also marginally 1% more compared to second quarter 2022, as shown in Figure 15.

**Figure 15: Quarterly Trends in Nickel Output**

Source: Ministry of Mines and Mining Development, 2023

Second quarter output benefited from ramping up of ore volumes and increased investment during the year 2022 and 2023.

### Diamond

Diamond output at 1.2 million carats in second quarter 2023 was 21% lower than 1.6 million carats produced during first quarter of 2023. This output was, however, 27% better than second quarter 2022 output, as shown in Figure 16.

**Figure 16: Quarterly trends in Diamond Output (Carats)**

### Chrome

Chrome ore output for second quarter 2023 amounted to 274,978.3 tonnes, which is 33.3% up from 206,354.3 tonnes produced in first quarter 2023. The second quarter output is also 15% higher than comparable period in 2022, as shown in Figure 17.

**Figure 17: Quarterly trends in Chrome Ore Output (tonnes)**

Source: Ministry of Mines, MMCZ, 2023

Chrome production is currently recovering from power outages and high costs of fuel which negatively affected production since the fourth quarter of 2022. The major challenge to production is, however, the depressed global outlook.

## Coal

Coal output recorded a 97% growth during the period under review when compared to the same period in 2022. On a quarter-to-quarter basis coal output increased by 12% in the second quarter of 2023 when compared to first quarter of 2023. Figure 18 shows the quarterly coal production trends.

**Figure 18: Quarterly Trends in Coal Output (tonnes)**

Source: Ministry of Mines and Mining Development, 2023

Increased processing capacity at one of the major mining houses following the procuring of additional mining equipment and engagement of more contractors for the open pit operations drove up coal output during the quarter under review.

## ELECTRICITY

Total power generated during the second quarter of 2023 amounted to 1,804.01 GWh, up 33.87% from 1,347.6 GWh recorded in the first quarter of 2023. The power generated was, however, 25.36% lower than 2,416.88 GWh produced during the second quarter of 2022.

Kariba accounted for about 61.27% of total production during the second quarter of 2023, compensating for the low throughput from Hwange and other small thermal stations. Independent power producers (IPPs) contributed about 6.52% to total power output.

Table 11 shows quarterly power output statistics from the major power stations and IPPs.

**Table 11: Quarterly Power Output**

	2022Q2	2023Q1	2023Q2
<b>Kariba</b>	1 647.49	615.82	1 105.34

<b>Total (Gwh)</b>	<b>2 416.88</b>	<b>1,347.6</b>	<b>1 804.01</b>

Source: ZERA ZPC, 2023

Power production by independent power producers (IPPs) surged by 19.64%, to 117.59 GWh in the second quarter of 2023, compared to the first quarter of 2023. The increase was due to ramping up of production from Zimbabwe Zhongxin Electrical Energy (ZZEE) thermal power station and Solgas Energy during the quarter under review.

During the second quarter of 2023, power generation by IPPs at 117.59 GWh was higher than 2023 first quarter production of 98.29 GWh.

Figure 19 shows the trend of quarterly electricity production by IPPs from first quarter of 2022 to second quarter of 2023.

## INFLATION DEVELOPMENTS

Annual inflation increased from 87.60% in March 2023 to end the second quarter of 2023 at 175.8%. The resurgence of inflationary pressures during second quarter of 2023 was partly attributed to exchange rate depreciation and speculative pricing.

Annual food inflation rose from 127.92% in March 2023, to 225.60% by June 2023.

Annual non-food inflation also surged from 65.13% in March 2023 to 119.29% in June 2023. Non-food inflation was largely driven by housing, water, electricity, gas and other fuels, transport, and miscellaneous goods and services. Figure 20 shows the developments in annual inflation since December 2021.

**Figure 20: Annual Inflation Profile (%)**

Source: Zimstat 2023

Month-on-month inflation also accelerated during the second quarter of 2023, rising from 0.13% in March 2023 to 74.5% in June 2023. The increase in monthly inflation was reflected through food inflation which rose from 0.29% to 104.16% over the period.

Month-on-month non-food accelerated from 0.0% in March 2023 to 49.52% in June 2023, mainly driven by rises in rent, utilities, other fuels and transport.

## 4. MONETARY DEVELOPMENTS

Broad money stock (M3) stood at ZW\$14 275.48 billion as at June 2023, compared to ZW\$3 195.36 billion in March 2023. This largely reflected quarterly expansion of 502.37% and 59.31% in the foreign currency and local currency components of deposits, respectively.

The increase in foreign currency deposits largely reflected valuation changes owing to exchange rate depreciation, from ZW\$929.86 per US\$1 in the quarter ended March 2023 to ZW\$5 739.80 per US\$1 in June 2023.

As a result of valuation changes, foreign currency deposits accounted for 87.48% of broad money, followed by local currency deposits, at 12.47%; while currency in circulation constituted the balance of 0.06%. Figure 21 shows the components of broad money and annual growth rates.

### Domestic Credit

Domestic credit registered a quarter-on-quarter growth of 282.85%, from ZW\$2 817.27 billion in March 2023 to ZW\$10 786.06 in June 2023. The growth was largely driven by increases of ZW\$7 565.66 billion (434.25%) in credit to the private sector; and ZW\$1 181.73 billion (482.502%) in public non-financial enterprises, largely reflecting valuation changes and interest capitalization on outstanding loans. The increases in nominal credit to the private sector was, however, offset by a decline of ZW\$948.43 billion (151.26%) in net claims on Government.

Credit to the private sector was mainly channelled to households and agriculture, which received 20.64% and 16.29% of the total credit,

respectively. The manufacturing and distribution sectors received 15.40% and 13.16% of the credit, respectively. Private sector credit shares for the rest of the economic sectors are shown in Figure 22.

**Figure 22: Distribution of Private Sector Credit.**

Source: Reserve Bank of Zimbabwe, 2023

Credit to the private sector was largely utilized for recurrent expenditures, 38.29%; inventory build-up, 28.14%; and fixed capital investments, 14.19%.

### Interest Rates

During the quarter ending June 2023, nominal lending rates quoted by banks ranged between 20% and 230%. Time deposit rates for 60-day and 90-day tenures averaged 69.59% and 68%, respectively, while the average savings rates were quoted at up to a maximum of 36.46%.

## 5. STOCK MARKET DEVELOPMENTS ZIMBABWE STOCK EXCHANGE (ZSE)

In the second quarter of 2023, the Zimbabwe Stock Exchange (ZSE) was characterised by bullish sentiments as investors flocked to the market for value preservation, considering the limited investment options on the money market.
